Think about your wedding keywords and what they really mean to you. What images or feelings do you get from thinking about them? What comes to mind? Jot down a few ideas here:

---

---

What images showcase the feeling you want your guests to experience? What colors do you vibe with? What are some design styles or elements that you gravitate towards? What are some fonts that feel like your wedding style?

**One last tip** is stay consistent. Be ready to say 'no' even to things you might really like but don't fit with your design aesthetic. Watch out for 'shiny object' syndrome.
